

PracticePro

Brand UI & Style Guide

Visual identity, spacing scales, and layout rules for PracticePro, Vega, Atrium, and Complete — maintaining UI consistency across all modules.

Dark Moss Green #4A694C	White #FFFFFF	Off-White #F9FAFB	Charcoal #1F2937
-----------------------------------	-------------------------	-----------------------------	----------------------------

1. Brand & Semantic Color System

Primary Corporate Palette

- **Dark Moss Green:** **#4A694C** (RGB 74, 105, 76) — Used for main brand accents, headers, and primary actions.
- **Backgrounds:** Clean White (**#FFFFFF**) or Off-white (**#F9FAFB**).
- **Text & Accents:** True Black (**#000000**) and Deep Slate/Charcoal (**#1F2937**).

ALOA / ARIA Semantic State Colors

To prevent brand confusion with Dark Moss Green, use these desaturated, soft semantic background and text pairings for warning and alert states:

State	Background	Text	Usage
High Priority / Alerts	#FCE8E6	#C5221F	Critical warnings, errors
Standard Reviews / Status	#E6F4EA	#137333	Success, completed items
Informational / Research	#E8F0FE	#1A73E8	Info, tips, research

2. Border-Radius Scale (Strictly Enforced)

All components must strictly adhere to this 3-tier scale to prevent visual drift:

Class	Size	Used For
rounded-md	8px	Form inputs, action buttons, small utility chips
rounded-lg	12px	Information cards, list items, navigation dropdowns, popovers
rounded-2xl	16px	Dashboard widgets, modal containers, hero blocks, layout wrappers

Note: rounded-xl (14px) is deprecated — migrate existing uses to rounded-lg or rounded-2xl based on context.

3. Shadows & Spacing Scales

Golden Ratio Spacing

All padding, margin, gaps, and layouts should align to the Golden Ratio proportional spacing system. In practice, use Tailwind's default spacing scale (which is close to this) and avoid arbitrary values unless specifically needed:

- **Tiny:** 8px (space-2 / p-2)
- **Small:** 12px (space-3 / p-3)
- **Medium:** 20px (space-5 / p-5)

- **Large:** 32px (space-8 / p-8)
- **Extra Large:** 48px (space-12 / p-12)

Elevation Shadows

- shadow-sm: Default flat card elevation.
- shadow-md: Interactive hover states.
- shadow-xl: Layered modal overlays and floating drop-downs.

4. Page Transitions

Transitions should be smooth and professional — inspired by Google Workspace, not jarring or flashy. For a legal practice management app, the goal is **calm confidence**.

Transition Principles

- **Duration:** 200-300ms for most transitions. Never faster than 150ms (feels abrupt) or slower than 400ms (feels sluggish).
- **Easing:** Use `ease-out` for elements entering the viewport, `ease-in` for elements leaving. `ease-in-out` for state toggles.
- **Opacity + Transform:** Combine `opacity` with `translateY(4px)` for a subtle "lift" effect on page changes. Avoid scale transforms on full pages (feels zoomy/unprofessional).
- **No bounce/spring:** This is a legal tool, not a consumer app. Avoid `cubic-bezier` overshoot curves.

Implementation

Use CSS transitions on the main content wrapper:

```
.app-content {
  transition: opacity 200ms ease-out, transform 200ms ease-out;
}
.app-content.entering {
  opacity: 0;
  transform: translateY(4px);
}
```

Or with Tailwind:

```
<div className="transition-all duration-200 ease-out">
  {children}
</div>
```

What NOT to do

- Full-page slide animations (left/right) — feels like a mobile app, not a desktop tool
- Scale/zoom transitions — feels disorienting
- Bounce or spring physics — too playful for a legal context
- Long fade durations (>400ms) — feels broken/slow

5. Typography

- **Primary Font:** Inter (sans-serif) — for UI, navigation, and body text
- **Document Font:** Times New Roman (serif) — for DraftPro/editor content
- **Monospace:** For code blocks and data tables
- **Heading Scale:** 10px → 12px → 14px → 16px → 20px → 24px → 32px
- **Body Text:** 14px (text-sm) for most UI, 13px (text-xs) for secondary/metadata
- **Line Height:** 1.5 for body text, 1.25 for headings

6. Component Patterns

Buttons

Primary:

```
bg-primary-600 text-white rounded-md px-4 py-2 text-sm font-bold
hover:bg-primary-700 transition-colors shadow-sm
```

Secondary:

```
bg-slate-100 dark:bg-zinc-800 text-slate-600 dark:text-zinc-300
rounded-md px-4 py-2 text-sm font-bold
hover:bg-slate-200 dark:hover:bg-zinc-700 transition-colors
```

Danger:

```
bg-red-600 text-white rounded-md px-4 py-2 text-sm font-bold
hover:bg-red-700 transition-colors shadow-sm
```

Input Fields

```
rounded-md border border-slate-200 dark:border-zinc-700
px-3 py-2 text-sm focus:ring-2 focus:ring-primary-500
focus:border-primary-500 outline-none transition-all
```

Cards

```
bg-white dark:bg-zinc-800 rounded-lg shadow-sm
border border-slate-100 dark:border-zinc-700 p-4
```

Modals

- **Container:** bg-white dark:bg-zinc-800 rounded-2xl shadow-xl
- **Header:** px-6 py-4 border-b border-slate-100 dark:border-zinc-700
- **Body:** px-6 py-4
- **Footer:** px-6 py-4 border-t border-slate-100 dark:border-zinc-700 flex justify-end gap-2
